FLOWER BULBS

LOS ROBLES CO.

FLOWER BULB Specialists

CALIFORNIA

This is where they grow

LOCATION

"Work-shops" and some of our growing fields are located between Twin Lakes and Del Mar, on the East Cliff Drive, three miles from Santa Cruz. Autos coming from Watsonville should turn onto Chanticleer Avenue and Seventeenth Avenue to Del Mar, thence to right on East Cliff Drive.

VISITORS

Interested visitors are welcome to see us at work. WE ARE CLOSED SUNDAYS. Freesias in their many colors are in flower during March; Tulips, Ranunculus, Anemones in March and April; Spanish Iris in April; Baby Gladioli in May and June; tall Gladioli in July to September.

TERMS

CASH.
6 bulbs at the dozen rate.
50 at the hundred rate.
We prepay delivery charges.

REMITTANCES

Customer's personal check preferred and will be customer's receipt. Any other form accepted.

GUARANTEE

Knowing that our success depends upon the satisfaction given our customers, we guarantee all shipments to reach customers in satisfactory condition and to be true to name.

DISCLAIMER

Most of the failures with seeds and bulbs are due to causes entirely beyond our control, such as unfavorable weather, too deep or too shallow planting, slugs, etc.; therefore LOS ROBLES CO. give no warranty, expressed or implied, as to description, purity, productiveness, or any other matter of any seeds, plants, bulbs, etc., they send out, and will in no way be responsible for the crop; if the purchaser does not accept the goods on these terms they are to be returned at once.

SHIPPING SEASONS

The shipping seasons are of course dependent upon the range of the planting season. It is advisable to order EARLY and we will deliver as the stock is ready to plant.

GLADIOLI

CULTURE OF GLADIOLI

Summer Flowering Type

Plant December to May—Blossom time May to September (Delivery time November to March)

Since the publication of our last catalog, we have added many new patrons and friends, indicating that we will have a larger field this season into which to introduce "THE FLOWERS OF GLADNESS" and the bulbs which "MAKE THE NEW YEAR GLAD."

GLADIOLI

There is no other flower which will give such great beauty and returns for the small amount of the investment. No flower will grow with so little care and the gladioli is beyond comparison with other flowers as a garden flower, and makes a wonderful decoration for the home when cut. Mass planting and sequence of three weeks between planting brings a continual blooming season in your garden.

WHERE TO PLANT

You do not have to restrict your plantings in rows or beds. Try planting them among the roses and shrubbery. Mix them in with the zinnias, marigolds and asters, and Halley planted with light blue delpiniums is a wonderful combination.

WHEN AND HOW TO PLANT

The culture is the easiest of any bulb. Plant in California from December to May (or after frost is past in colder climates) placing the bulbs six inches apart and about three to four inches in depth, in good mellow soil. Avoid excessive fertilizer at planting time, but a little bone flour will aid in growth. Frequent waterings are necessary to keep growth advancing steadily, and do not be afraid to cultivate after watering. The three Rs of good glads are GOOD SOIL, FREQUENT CULTIVATION and PLENTY OF WATER. After flower is through blooming, dispense with watering, cut the spike off near the ground (leaving four leaves) and when thoroughly ripe, lift bulb and store until planting time, in shallow box.

A HOBBY

Why not put in a bed of gladioli as a hobby?

GLADIOLI

Each	Doz.	100
AMERICA—One of the finest light pinks, orchid like in flower	\$.50	\$ 3.50

GIFT BOXES FOR THE GARDEN

Make very attractive and lasting remembrances for your friends or the amateur gardener. Such a gift gives great pleasure, as the recipient has the pleasure of planting and growing these flowers.

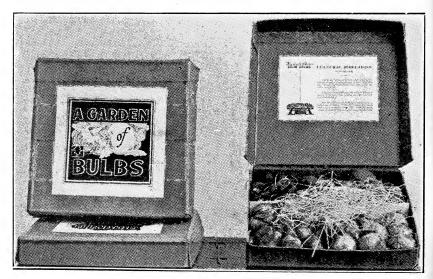

To meet an increasing demand, we are packing some of the varieties of bulbs in cartons suitable for gift boxes, two of which are described here. We can make up these boxes in any special mixture or price.

GARDEN OF BULBS

Containing our 50 seasonable bulbs, including gladioli, daffodils, hyacinths and tulips. \$3.00.

These boxes are also packed with other bulbs and in all sizes, as listed under the various varieties.

"TO MAKE THE NEW YEAR GLAD JUST SEND A BOX OF 'GLADS'."

COLLECTIONS OF GLADIOLI BULBS

GARDEN FULL OF GLADIOLI—50 Gladioli, rep-
resenting every color of the Gladioli kingdom. In
a specially packed box for \$2.50
HALF GARDEN—Same as above box but containing only 25 bulbs in mixture\$1.25

"ONLYONE" COLLECTION — Containing one each of 25 varieties, all different named varieties, which if bought separately would invoice at five dollars. This will include Rose Ash, Mrs. Dr. Norton, Gretchen Zang, Herada and 20 other wonderful sorts ______\$3.00

ORCHID COLLECTION—Containing six Gladioli bulbs of orchid like colors, consisting of Mary Fennell (20), Byron L Smith (35), Louise (50), Muriel (1.00), Mrs. Dr. Norton (30), Rose Ash (50).

A \$2.85 value \$1.50

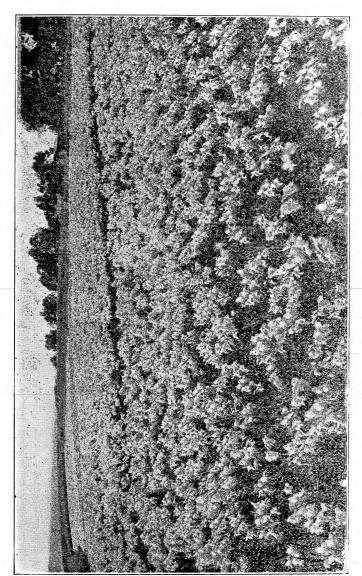

BUTTERFLY GLADS, Primulinum types—Containing 25 large Gladioli bulbs of pastel colorings, ranging from creamy yellow to burnt orange, packed in neat carton. Very popular......\$1.00

RAINBOW COLLECTION OF GLADIOLI—Containing 12 choice Gladioli bulbs, all different, for \$.75 This will include Mrs. Pendleton (10), Herada (15), Niagara (10), Mrs. Watt (10), and eight other good varieties.

OLD MEDAL COLLECTION—Packed in a carton containing one bulb each of Mrs. F. Pendleton (10), Schwaben (10), War (10), Gretchen Zang (20), Herada (15), Empress of India (10), Niagara (10), Lily White (10), Panama (10), Mrs. Watt (10), Prince of Wales (15), Halley (10). A wonderful assortment of 12 Gladioli of great merit \$1.00

We can make up any desired collection for you.

Field of Miniature Gladioli-Taken May 2

MINIATURE GLADIOLI

Plant October-November

Blossom Time May-June

The culture of these Minature Gladioli is very easy. Plant from October to December and you will be rewarded with wonderful blooms in May and June. Plant the bulbs 6 inches apart and 3 to 4 inches deep. Mass planting is very effective, and in our own growing we often get three or more spikes from one bulb. Accompanying illustration shows one large check of Peach Blossom in bloom. The flowers are borne on long slender stems and are in great demand as cut flowers.

DAFFODILS

PLANT OCT.-DEC.-FLOWERS FEB.-MARCH.

To briefly explain the words Narcissus and Daffodil—Daffodil is the English name for a large family of plants and Narcissus is the Latin name; in other words, they are the same thing. However, custom has decreed that they do not mean the same thing, hence the confusion.

The word Narcissus is generally confined to the pure white petaled division like the Poeticus and to the bunch flowered varieties like the paper white. All others are in

popular language Daffodils.

We list only the better and the newer varieties. They bloom in March. For outdoor planting, set before December in rich ground four inches below the surface and four to six inches apart.

FREESIAS

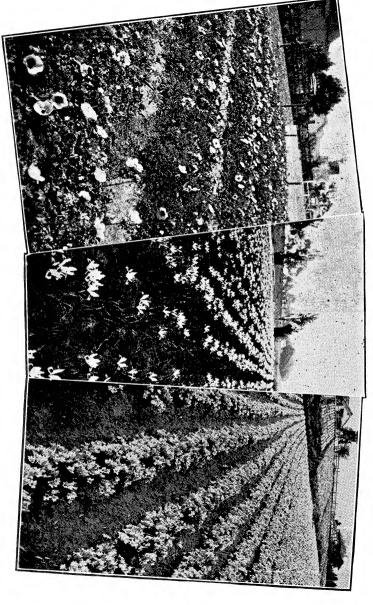

(For delivery until October 1st)

Although the culture of Freesias is simple and easy, there is a drawback in that the bulbs have a habit of going on strike. You may plant a nice young bulb which looks the picture of health, which for a whole twelve months gives no signs of life and then starts to grow as if nothing had happened.

The variety most known is the white Freesia Purity, the one grown at Santa Cruz for commercial purposes. We are offering this season some decided acquisitions of merit, with

strang branching stems.

HYACINTHS

PLANT OCTOBER-DECEMBER—FLOWER IN MARCH

Hyacinths are very fragrant and come in a great variety of colors. They make a magnificent display when grown outside in a bed. They are also very satisfactory when grown in pots or in glasses of water. We are listing the single type only, as they are far superior to the double, and more certain to bloom. For outdoor culture set the bulbs so that the tops will be 3 to 4 inches below the surface and 6 to 10 inches apart. For pot culture use a 4-inch pot for a bulb or a large pot for 2 or 3 bulbs, and leave the tops of the bulbs just above the surface. After potting give a good watering and set away in a cool place and cover with coal ashes or sand until thoroughly rooted, which takes from 8 to 10 weeks. During this time do not allow them to become dry. They may then be set in a cool, light place until the flower spikes have developed, when they may be placed wherever they are wanted.

NAMED VARIETIES OF HYACINTHS

Large sized bulbs for growing in pots and outside: 15c each, \$1.50 per 12, \$10.00 per 100

SPANISH AND HOLLAND IRIS

(Plant During September)

(FLOWER TIME—APRIL-MAY)

One of the most satisfactory varieties of Iris to grow, being particularly hardy. The flowers are of great beauty, having many different blendings in color, and if cut when in the bud will last a long time in water. For best effect they should be planted in clumps or masses of from 25 to 100 or more bulbs, set 6 inches apart and 2 to 3 inches deep. They grow 18 to 24 inches high and bloom from the end of March on through June.

(These should be planted during September. Orders should be booker early, and we will not supply after September 30th. All orders booked subject to crop production.)

SUSIANA MOURNING IRIS

This is a very beautiful and quaint Persian variety growing about 18 inches tall and blooming in April and May. The large flowers are chocolate light gray veined with a network of chocolate lines. The rhizomes should be set 3 inches deep and 12 inches apart. Stock very limited this season.

Strong roots. Price 75 cents each.

See back cover for illustration of Susiana Mourning Iris

IRIS PAVONIA

The true Peacock Iris from Cape Colony and botanically known as Moraea Glaucopis, Moraea being the African representative of the Iris. While of a fragile nature, this variety is well worth the while in your garden—a wonderful white Iris with segments the size of a quarter dollar with a blue spot at the base like a Peacock eye. Stock is very scarce in America.

Strong corms. 15c each, \$1.00 per dozen

GERMAN IRIS

These are all sun-lovers, and delight in a warm, well-drained situation, where the surface-creeping rhizome can get a good baking in summer. They will thrive in almost any soil or situation except a wet one, which causes the rhizomes to decay rapidly. This is the group best known and most commonly cultivated. The flowers are the true fleur-de-lis, and they are well called the "orchids of the garden," for they fairly out-rival the orchids in delicacy of structure and wide range of coloring, including rich yellows, soft blues, intense purples and claret-reds, beautiful bronzes and pure whites, in every conceivable combination.

CULTURE—A dry, sunny location suits them best. In wet places they are likely to decay. They may be planted in early spring, but the most favorable time is during August and September, the earlier the better, as that is their dormant season, after which they make a root growth, becoming established before winter. Nearly all Irises may be divided and replanted mmediately after flowering if the roots are not allowed to become dry.

DARWIN TULIPS

PLANT OCTOBER-DECEMBER-FLOWER APRIL.

Darwins are the most satisfactory of all Tulips. They are stately in appearance, attaining a height of 24 to 30 inches, and producing beautiful globular flowers of heavy texture in a large range of colors. They bloom in April and May and are unsurpassed for bedding and cutting.

Tulips can be planted from October till late in December. They require a moderately rich soil, which should be well drained. If the soil is in poor condition use a little bone meal or well rotted manure. Plant the bulbs 6 or more inches apart and set the tops 3 inches below the surface. If the soil is heavy, place a small quantity of sand at the base of each bulb. They will remain in bloom for a longer period of time if planted in a light, shaded location.

SNOWDROPS

(Galanthus)

(Plant October-December-Blossom March-April.)

Plant 3 inches apart in good loam, 2 inches deep. May be left in the ground from one season to another. Per 12. 50 cents; per 100, \$3.50.

SNOWFLAKES

(Leucojum Vernum)

These are similar to Snowdrops, but of stronger habit. The flowers are white, tipped with green.

Plant 3 inches apart in good rich soil, 3 inches deep. May

be left in the ground for several years.

Per 12 \$.40, per 100 \$3.00.

SPARAXIS

Plant October-December—Blossom March to April. Beautiful flowers borne on graceful spikes; colors of the brightest shades. They are tigered, blotched, spotted, streaked and flushed. Plant like baby gladioli.

TRI-COLOR ______\$.10 \$.50 \$3.50

TUBE ROSES

Plant Early Spring.

Blossom During Summer.

Bulbs ready February and March.

It is advised to give these the warm sheltered location in your garden, planting 8 inches apart and 4 inches deep.

Each Doz. 100

DOUBLE DWARF PEARL—Pure white, wax-like and extremely fragrant..........\$.10 \$.90 \$6.00

TRITONIA

Plant September-March—Blossom April.

We have always listed this bulb under LAPEYROUSIA,

but other seed stores list it under this name. It is often called the flame-colored freesia or the pink freesia.

Doz. 100
Strong bulbs\$.50 \$3.50

WATSONIA

Watsonias are similar to gladioli and are in bloom from May on. The spikes grow from 3 to 4 feet tall, and bear many stalks of gladioli-like flowers. They thrive best in a sunny location. Plant the bulbs three inches deep and 8 inches apart.

ADDEDNEL Who lovest and hast	Each	Doz.	100
ARDERNEI — The largest and best white	3 .10	\$.75	\$ 5.00
CLEMENTINA—Pink	.20	2.00	12.00
MRS. ELLA BIRNEY—Red	.20	2.00	12.00

HERBAECOUS PAEONIES

Plant them in deep rich soil, setting the roots so that the crowns are covered with 2 inches of earth. If planted too deep they are not likely to bloom freely.

STRONG CLUMPS—In separate colors or assorted, 60 cents each, \$6.00 per dozen.

COURONNE d'OR-Pure white with amber yellow stamens, fragrant.

EDULIS SUPERBA—Deep rose pink shading lighter.

FELIX CROUSSE-Brilliant flaming red.

FESTIVA MAXIMA—Finest pure white.

ELEGANTISSIMA—Light cherry pink, mid-season.

SWEET PEAS

PLANT MORE SWEET PEAS.

Sow sweet pea seed in November and December for early spring flowers. The soil for sweet peas should be rich and deep. Prepare the ground by giving a liberal dressing of well-rotted manure and bone meal. Sow the seed thinly 1 inch deep and thin out to 6 inches apart, as flowers will not be large if too crowded.

WINTER FLOWERING VARIETIES

These varieties have the large ruffled blossoms of the Spencer type and the early flowering habit of the Winter Sweet Peas. They will commence flowering from four to six weeks earlier than the regular Spencer type and remain in bloom for a long season.

We offer this assortment of varieties as being the best in their respective classes, and containing as wide range of cloor as possible.

EARLY ALL WHITE-White.

EARLY AMETHYST-Royal purple.

GARDEN (COLLECTION—7	varieties	.50

Gold Medal Mixture Spencer Sweet Peas, per package, 10c; per oz., 20c; per ½ lb., \$1.25.

ZINNIA SEED

NEW GIANT DAHLIA FLOWERED ZINNIAS.

A superb strain of giant flowered Zinnias, originated by John Bodger & Sons Co., California, a few seasons ago. Remarkable not only for their free blooming qualities, but their magnificent range of colors. They vary from purest white to dark crimson and purple, with innumerable intervening odd shades, of terra cotta, salmon and golden yellow. The blossoms are not only of immense size, but are quite distinct in form to any other strains of Zinnias grown at the present time. The petals are exceedingly broad and beautifully channeled, which reminds one of Dahlias, rather than Zinnias, hence the name of the strain.

Blossoms are simply enormous as to size— $5\frac{1}{2}$ to 6-inch blossoms being quite common. The plants are of sturdy growth and blossom without intermission from early sum-

mer until late autumn.

- **EXQUISITE**—By far the most pleasing. A true dahlia flowered color, light rose with center a deep rose (Tyrian Rose).
- ILLUMINATION—Similar to Exquisite but a striking color of self rose.
- CRIMSON MONARCH—By far the largest and best of the red shades. Flowers often 8 inches in diameter.
- ORIOLE—The most beautiful of its class. An immense orange and gold bi-color, changing slightly as it ages.
- SUNRISE—A combination of pleasing apricot shades changing to buff as it ages.

COLLECTION—One packet each of the above named sorts ______\$1.00

SPECIAL MIXTURE—A well blended mixture containing all the above and many other novelties. A wonderful assortment. Price per pkt. 25c each.

ESCHSCHOLTZIA

This beautiful and brilliant annual has been greatly improved in recent years as a result of the painstaking efforts of the hybridizers, and we now offer a COLLECTION of many BEAUTIFUL AND UNUSUAL COLORS.

CRIMSON KING—Carmine	.10	.25

COLLECTION of 6 varieties in neat packet 50 cents.

GRASSES FOR LAWNS

Grass seed for lawns may be planted in the fall or in the early spring. Use every effort to have ground in best of condition before sowing. Prepare soil well and after sowing the seed sprinkle with bone meal, and rake seed in lightly, and roll down but not too tight. If weather is warm, it is advisable to mulch with straw. Keep wet. Use one pound of seed to 200 square feet except clover, then use one pound to 300 square feet. It pays to plant thick.

Each fall with the first rains, try applying bone meal, blood and wood ashes dusted over your lawn. Regular pe-

riods of rolling will improve its appearance.

KENTUCKY BLUE GRASS—A wonderful lawn maker where conditions are right. Requires plenty of water, warmth and care.

WHITE CLOVER—Extra dwarf recleaned.

PACIFIC RYE—Suitable for sandy soils.

EVERGREEN LAWN MIXTURE—A well balanced mixture of necessary grasses to meet all conditions. Highly recommended.

FERTILIZERS

There is an available plant foood for every demand of nature and we carry a complete stock of all the necessary elements and mixtures for garden use.

ELEMENTS OF FERTILITY

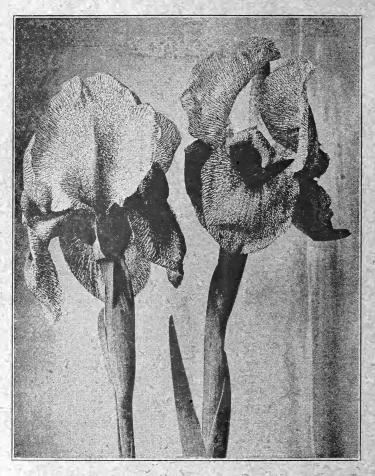

- NITROGEN: Ammonia is the equivalent term for nitrogen. It produces leaves and stalks and gives vigor to the plant. Stunted plants, spindling stalks, and pale green leaves plainly indicate that additional available ammonia is needed.
- PHOSPHORIC ACID: Phosphoric Acid is the plant food element that develops root system, hastens maturity, makes plump, heavy kernels, solid corn, large cotton bolls and gives strength and productive power to the plants.
- POTASH: Potash stiffens straw and stalks, promotes cellular growth and aids in starch formation.

When any one plant food element is deficient in the soil, biggest yields of best quality cannot be grown. The lacking plant food should be supplied in available form and from a high-grade source.

- IMPORTANT: If your land is sour, we recommend sweetening with lime several weeks before applying fertilizer.
- FOR BULBS: We suggest mixing bone flour with ground before planting, and blood to induce top growth.

We would be pleased to advise you in the use of fertilizers.

As prices are dependent on cost of raw products in open markets, price list of fertilizers will be furnished on request.
